Dan:

You asked for my personal views on the attached.

First, I think this is a legitimate area for ICS concern and probing. Even more important, I would think, would be a look at the Korean incident and the uniformly curious handling of the information by all of the town's nerve centers.

In the Lebanon case, sure, CRITIC would have been the procedurally-correct handling. But it is clear on the face of it that those who required the info had it. To be sure, NSA might have tweaked its collection arrangements, but theoretically NSA shouldn't be making arbitrary decisions without being tasked and the right officials were in possession of the information so as to have tasked NSA if they had thought to do so.

As bottom line...there may be too much verbiage in this paper but CRITIC will be useful only to the extent it is employed. CIA should not make itself an exception and this paper will help me drive that point home.

So...I would reduce the length and maybe some of the tone of the paper but go ahead and send the memos, in CIA's case to me, not DDO.

② One last thing, please don't ask to use the CIA cables in true copy. They can be used but bereft of cryptonyms, routing indicators (the paper should not refer to RYBAT), and internal dissemination.

1A NOTE FOR:

1A FROM :

SUBJECT : Meloy Assassination Paper

The attached documents review the failure of State and the DDO to use established CRITIC procedures in a case for which they were clearly intended -- the Meloy assassination. Also attached are letters for your signature to the Director, INR, and DDO inviting comment on the review prior to further airing of the problem. Since a similar failure appears to have occurred in the Korean case, I believe it important to show the Community we are watching.
